# Fitch Downgrades **Ecopetrol**, Ocensa and Al Candelaria, Affirms Other **Colombian Corporates**

Fri 03 Apr, 2020 - 17:29 ET

Oleoducto Central S.A. (OCENSA) and A.I. Candelaria (Spain), S.L. and affirmed its ratings on other Colombian corporates following this week's Sovereign Rating downgrade of Colombia. The rating downgrades of Ecopetrol, OCENSA and A.I. Candelaria reflect the direct and indirect

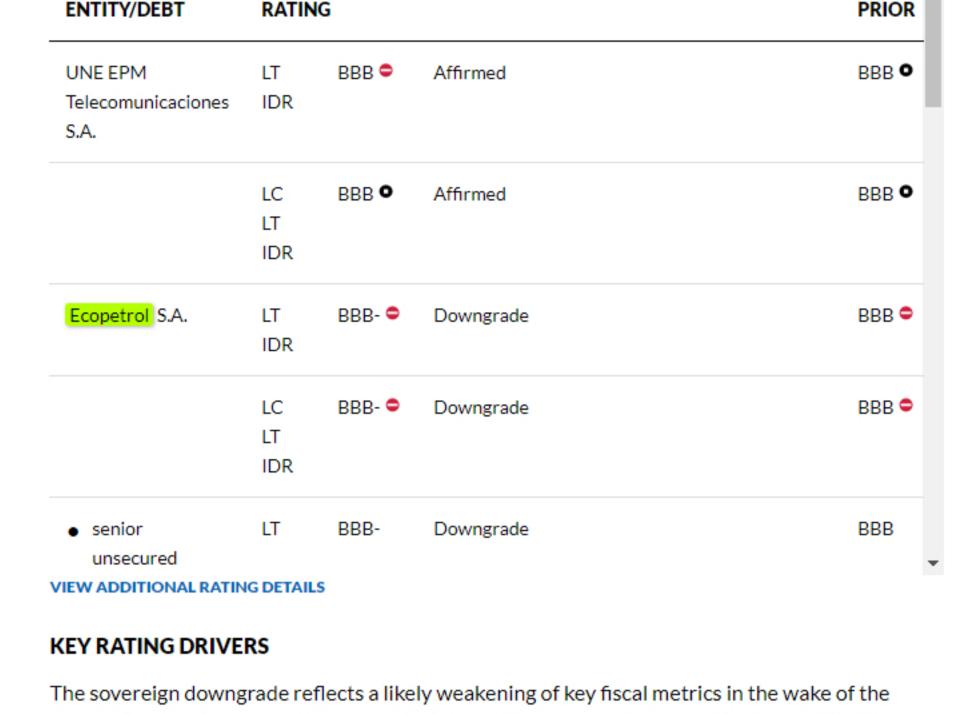

linkage of these companies to the Sovereign Rating downgrade of Colombia, which Fitch

downgraded this week to 'BBB-' from 'BBB'. The ratings for Emgesa, Isagen and UNE EPM

Fitch Ratings - New York - 03 Apr 2020: Fitch Ratings has downgraded Ecopetrol S.A.,

Telecomunicaciones have been affirmed at 'BBB' reflecting the country ceiling for Colombia of 'BBB'. The negative outlooks on the foreign currency ratings reflect the fact that they could be negatively impacted by downgrades of the country's Sovereign Rating and country ceiling. These companies operate within Colombia and do not have substantial offshore cash or EBITDA from other countries. The ratings on Grupo de Inversiones Suramericana (Grupo Sura) ('BBB'/Stable) reflect their offshore cash and EBITDA outside of Colombia. The applicable country ceiling for Grupo Sura is that of Chile, since cash flow from Chile is sufficient to cover interest expenses for both companies. Grupo Energia Bogota's (GEB's) ('BBB'/Stable) applicable country ceiling is that of Peru, since cash flow from Peru is adequate to cover GEB's interest expense. The ratings of Transportadora de Gas Internacional (TGI) ('BBB'/Stable) reflect its strong linkage with its parent company, GEB. A further downgrade of Colombia's Sovereign Rating will likely result in rating downgrades for Ecopetrol, OCENSA, A.I. Candelaria, Emgesa, Isagen and UNE EPM Telecomunicaciones.

RATING ACTIONS

# debt burden in recent years and an expected fall in tax revenues have left the government with

less fiscal space to counteract economic shocks, in Fitch's view. The Negative Outlook reflects downside risks to the outlook for economic growth and public finances, and to the capacity and quality of the government's policy response to decisively cut deficits and stabilize debt over the coming years, given the scale of the shocks. RATING SENSITIVITIES Developments that May, Individually or Collectively, Lead to a Positive Rating Action:

Fitch does not currently anticipate developments with a high likelihood of leading to a positive

rating change. However, the main factors that could lead Fitch to stabilize the Outlook include:

economic downturn caused by a combination of shocks stemming from the sharp fall in oil prices

and efforts to combat the worldwide coronavirus pandemic. Fitch expects a moderate

contraction of the Colombian economy by 0.5% in 2020, driven by a significant slowdown in

domestic demand and oil exports, followed by a modest recovery of 2.3% in 2021. A rise in the

-- Fiscal consolidation consistent with an improved trajectory for public debt dynamics.

-- Reduced external imbalances that improve external debt and liquidity ratios.

-- A return to economic growth prospects consistent with medium term potential above 3%.

-- Failure to achieve a fiscal consolidation consistent with stabilization and eventual reduction in the government debt burden.

Developments that May, Individually or Collectively, Lead to a Negative Rating Action:

-- Sustained large external imbalances that lead to a continuous rise in the external debt burden.

Ratings of Non-Financial Corporate issuers have a best-case rating upgrade scenario (defined as

the 99th percentile of rating transitions, measured in a positive direction) of three notches over a

performance. For more information about the methodology used to determine sector-specific

### three-year rating horizon; and a worst-case rating downgrade scenario (defined as the 99th percentile of rating transitions, measured in a negative direction) of four notches over three
