

EC's price-to-sales ratio: Is it a good investment opportunity?

Patricia Turner May 2, 2025 Finance

Ecopetrol SA ADR (EC)'s stock has witnessed a price declined of -0.74% from the previous close with its current price standing at \$8.00. Its current price is -36.45% under its 52-week high of \$12.59 and 10.96% more than its 52-week low of \$7.21. Based on the past 30-day period, the stock price is -18.76% below the high and +2.62% above the low.

The 200-day Simple moving average is often placed more emphasis on by traders because of daily price changes. Investors will use the SMA-200 in different situations in trading activity as a key indicator to determine their support and resistance levels, and at the moment, EC's SMA-200 is \$9.09.

Additionally, it is important to take into account EC stock ratios, including its price-to-sales ratio, which is 0.51 for the last twelve months. Likewise, its price to free cash flow for the last twelve months stands at 2.21. EC's price to book ratio for the most recent quarter was 0.87, resulting in an 4.86 price to cash per share for the period.

How does **Ecopetrol** SA ADR (EC) stock rate among analysts? Buy, sell, or hold?

The key to trading is to concentrate on the future rather than on the past. During uncertain times, it can be hard to make decisions. The analysts who understand how a market works are usually the most accurate at forecasting its future. Currently, there are 7 brokerage firms that recommend the stock as a Hold. The ratings are commonly aggregated into a single number between 1 and 5. Buy or strong buy is scored 5, outperform is scored 4, hold is scored 3, underperform is scored 2 and strong sell is 1. Using a scale of 1-5, the current average recommendation is 2.71 in simple terms.
